Notification dated 4th July 1947.

No. D1. 2830—46-47. In exercise of the powers conferred upon me by sub-clause (1) of clause 4 of the Vegetable Oil Products Control Order, 1946, I hereby prohibit the manufacture, stock or sale of any vegetable oil product which does not conform to the following particulars namely:—

1. It shall not contain any harmful colouring, flavouring or any other matter deleterious to health.
2. It shall not have moisture exceeding 0.25 per cent.
3. The melting point as estimated by the capillary slip method (as described in Note I below) shall be from 31° C to 37° C, both inclusive with a tolerance of 20° C on either side.
4. The Butyro Refractometer reading at 40° C shall not be less than 48.0.
5. It shall not have unsaponifiable matter exceeding 1.5 per cent.
6. It shall not have free fatty acids (calculated as oleic acid) exceeding 0.25 per cent.
7. Diacetyl, if present, shall not be in excess of six parts per million.
8. The product on melting shall be clear in appearance. Its taste shall be free from staleness or rancidity.
9. It shall contain refined or refined hydrogenated sesame (til) oil not less than 5 per cent by weight so that when the Vegetable Oil Product is mixed with refined groundnut oil in the proportions of 20 : 80, the red colour produced by the Baudouin test (as described in Note II below) shall not be lighter than 2.0 units in a 1 c.m. cell of a Lovibond scale.

Note I.—The "Capillary Slip Method" is as follows:—

- (i) Thin walled glass tube open at both ends with an external diameter of 1.2 to 1.5 m.m. and internal diameter of 0.83 to 1.1 m.m. and length 5 to 6 cms. should be used after proper cleaning and drying.
- (ii) The sample of fat should be completely melted and well mixed at a temperature of about 50° C. Insert the capillary tube so that a column of fat about 1 c.m. long is forced into it. Allow the fat in the tube to just set by keeping the tube in a horizontal position during winter, and during summer the tube may be put on a perforated metal tray which is so placed inside a small water-bath containing water at 15° C–17° C that the bottom of the tray just touches the water.
- (iii) The tube is then placed in a test-tube immersed in water at 15° C–17° C for one hour.
- (iv) Suspend a thermometer (reading in 1/5th of a degree) in the centre of a beaker of water at 10° C, (the beaker is to be provided with side-tube heating arrangement) so that the lower end of the fat column is 3 cms. below the surface of water. Heat the side tube of the

apparatus gently, so that the temperature of water increases slowly at the rate of 2° C per minute till the temperature reaches 25° C. and thereafter at the rate of 1/2 a degree per minute.

- (v) Note the temperature of water when the fat commences to rise in the tube. This temperature is recorded as the melting-point. The thermometer used in this test should be checked against a standard thermometer calibrated and certified by the National Physics Laboratory, Reading, England.

Note II.—The Baudouin test shall be carried out as follows:—

Place in a test-tube 5 c.c. of the sample (20 parts of vegetable oil products and 80 parts of refined groundnut oil) and 5 c.c. of Hydrochloric Acid (Specific Gravity 1.19) and add to it 8 drops of 2 per cent solution in alcohol of freshly distilled furfural; shake vigorously for two minutes and allow to stand. The acid layer becomes distinctly red. Quickly filter the acid layer through a wet filter paper and examine the filtrate against a Lovibond scale in a 1 c.m. cell or against a red colour Comparator.

If the Vegetable Oil Products on being shaken with hydrochloric acid alone, conveys a redness to the hydrochloric acid owing to the presence of certain artificial colouring agents, the procedure is as follows:—

Shake 10 ccs. of the melted Vegetable Oil Products in a separating funnel for half a minute with 10 ccs. of hydrochloric acid, specific gravity 1.125. Draw off the red acid layer which collects at the bottom of the funnel and repeat the process until no further coloration takes place. During the treatment do not permit the contents of the separating funnel to exceed that necessary to melt the fat. After the hydrochloric acid has been completely removed apply the Baudouin test as described above.

K. SUBBA RAO, *Commr. of Income-tax.*

OFFICE OF THE DIRECTOR OF GEOLOGY IN MYSORE, BANGALORE.

Notification dated 23rd June 1947.

Re:—The grant of permission for practical training to post-graduate Geology students in the Mysore Geological Department.

No. G. 4588. Applications are invited from graduates in Geology who desire to undergo a course of practical training under the Mysore Geological Department. The course of training will be for a period of about six months and from among the applicants not more than four will be selected for training. The selected candidates will be given opportunities to work under the officers of this Department engaged in geological survey, mineral survey and prospecting, mining, and also analysis of ores and minerals.

CONDITIONS.

1. No fees will be levied for this training in the case of Mysoreans by birth or domicile; but in the case of non-Mysoreans, a lumpsum fee of Rs. 100 will be charged for the entire period of training of about six months. The fee is payable in advance before the candidate joins the Department for training.
2. Two students of the Sri Jayachamarajendra Occupational Institute who have passed the Diploma Examination in Mining may also be admitted in addition to undergo a course of training in both open quarrying and underground mining at the Bellary Gold Mines and other places for a period of six months.
3. This practical training will not by itself give the students any claim whatsoever—express or implied—for any of the appointments in the Department either in the permanent or temporary establishment.

4. The students selected for the training should make their own arrangements for boarding and lodging.

5. The students selected should be prepared to work in any part of the State where the Director arranges for their training and they should strictly carry out the instructions given to them by the officers under whom they may be posted for training. Such of those who fail to comply with the rules, work diligently and make satisfactory progress during the period of training, are liable to be sent away even in the middle of their training period without refunding any portion of the fee which might have been paid by them.

6. The applicants should submit their applications, together with copies of testimonials, if any, with full details regarding their educational qualifications, so as to reach this office on or before 5th July 1947.

No attention will be given to late applications.

Intimation will be sent to the candidates selected for training by about the 10th July and the selected candidates should report themselves for training on or before the 15th July 1947.

For further details, the applicants may either call in person during the working hours of the office of the undersigned or write for necessary information required.

OFFICE OF THE SPECIAL OFFICER, FUEL SUPPLIES, BANGALORE CITY.

Notice dated 16th June 1947.

No. F. Mis. 248—46-47. Order under sub-rule (2) of Rule 75 (A) of the Defence of India Rules regarding requisitioning Casuarina—Jungle—fuel or charcoal in the following property:—

No.	District	Taluk	Hobli	Village	S. No.	Extent	Owners Name	Father's Name	Kind	No. of trees.	Estimated age.	Estimated qty.
1	Kolar	Malur	Kasaba	Mylappanaballi	58	1 10	Abdul Azur	Mastan Sab	Casuarina	1,000	9 years	60 tons.

* Tons Bags. (Bag=75 lbs. net weight of charcoal.)

WHEREAS it has become necessary, with a view to maintain fuel—charcoal supplies essential to the life of the community in Bangalore City, to requisition the fuel—charcoal available in the property described above, notice is hereby given to Mr. Abdul Azur, and all others interested therein, that I, A. N. Anantharamaiah, Esq., B.Sc., LL.B., Special Officer, Fuel Supplies, Bangalore City, in exercise of the powers vested in me as per G. O. No. SD. 5936—C. 48-46-18, dated 21st January 1947, under Rule 75 (A) Defence of India Rules as applied to Mysore and continued under the Supplies, Services and Miscellaneous Provisions (Temporary Powers), Emergency Act, 1946, have decided to acquire the abovementioned fuel in pursuance of sub-rule 2 thereof. I further direct that to avoid all delay, this notice be published in the Gazette under the same sub-rule.

2. You are hereby directed to arrange to cut and transport and deliver all the fuel available therein to the undersigned at the Railway Station—Weigh, Depot, Bangalore City. You should deliver not less than 20 tons bags, before 10th July 1947, and thereafter 20 tons per week till the supply is exhausted. You will be paid compensation at prevalent rates.

3. Under sub-rule 2 of the Rule 75 (A) of the abovesaid rules, you are prohibited from disposing of the fuel or any part of it to any other party without the written permission of the undersigned.

4. The property requisitioned vests in Government free of all encumbrances immediately after the service of notice on you, or after the date of publication of the notice in the Official Gazette, whichever is earlier.

5. If, to your knowledge, others are interested in this property, you should notify in writing this office before taking compensation.

6. If you fail to arrange for cutting or transporting the fuel as per paragraph 2 *supra*, a Government Agent will be appointed to cut and transport the commodity and out of the compensation otherwise due to you, the expenses of the Government agent will be deducted.

7. If any dispute arises regarding the apportionment of compensation from among parties interested, an Arbitrator will be appointed under sub-rule 4 of Rule 75-A.

8. You are further informed that under sub-rule 7 of Rule 75-A, if any person contravenes any order under this rule, he shall be punishable with imprisonment for a term which may extend to 3 years or with fine or with both.
